

COMPUTER X

Questions Distribution

According to the Chapters.

**This Distribution is carried out According to
NEW BOOK OF COMPUTER.**

COMPILED BY: Miss. Rabbiya Kamran

QUESTIONS		Years
UNIT:1	PROBLEM SOLVING AND ALGORITHM DESIGNING	
Section "B"		
2. What is an algorithm?		2025
2. List of any three advantages of designing flowchart. 10. Define Queue and Stack.		2024
5. Describe the advantages of algorithm. 13. Differentiate between queue and stack in data structure.		2023
6. Why is there need of index in an array?		2022
Section "C"		
18. Describe the types of Linear Data Structure.		2025
14. Explain the steps involved in problem solving. 17. Differentiate between Algorithm and Flowchart. 18. Describe Tree and Graph.		2024
18. Explain non-linear data structure and its types.		2023
14. Write any three steps of problem solving.		2022
SOME IMPORTANT QUESTIONS FROM NEW BOOK		
1. Describe the steps involved in problem solving. 2. What are the advantages of developing algorithms? 3. List any three advantages of designing flowcharts. 4. What is the difference between tree and graph data structure? 5. What is the difference between queue and stack data structure? 6. What is the need of index in an array? 7. With the help of a sketch define: Push, Pop, Overflow and Enqueue, Dequeue.		

UNIT:2		BASICS OF PROGRAMMING IN C++	
Section "B"			
3. Define Reserved words. 5. What are Strings in C++? 10. Differentiate between Constant and Variable. 11. What is a computer program?			2025
3. What is a computer program? 4. Define the rules for naming variable. 5. What is the difference between Source code and Object code? 6. Differentiate between constant and variables. 11. Define the following: (i) Syntax error (ii) Logical error OR—(i) Compiler (ii) Interpreter 12. What is the difference between Low-Level language and High-Level language?			2024
2. Differentiate between Constant and Variable. Write at least three data types in C++. How much memory does each require?			2023
2. What is Computer Program? 7. Write down any three rules of naming variable in C++. 10. What are strings in C++?			2022
Section "C"			
16. Why do we need a language translator? Describe its types.			2025
15. Give description of the following codes and symbols: i) #include<iostream> ii) using namespace std; iii) Int main()			2024
14. What is an error in computer programming? Describe its types.			2023
15. Differentiate between constant and variable. 16. Describe the following translators: (i) Compiler (ii) Interpreter (iii) Assembler			2022
SOME IMPORTANT QUESTIONS FROM NEW BOOK			
1. What is computer program? 2. List five common high-level languages used and describe their purpose. 3. Using the rules of naming variable, develop ten meaningful and valid variable names. 4. Write and two differences between machine and assembly language 5. What is the difference between declaring and initializing a variable? 6. What is the difference between source code and object code?			

7. List any four advantages of using an IDE.

UNIT:3

INPUT/OUTPUT HANDLING IN C++

Section "B"

4. What is the importance of Flowchart for solving a problem?
6. What is Statement Terminator? Why do we use it in our programs?
7. Define comment statement and its types.

2025

7. Write the purpose of following escape sequence:

(i) \n (ii) \t (iii) \b

9. Differentiate between Relational Operators and Logical Operators.

13. Define Arithmetic assignment operators with examples.

2024

7. What is meant by Arithmetic assignment operator?

2023

5. Differentiate between Arithmetic operators and relational operators.

2022

8. Write the uses of any three escape sequences:

* \t * \n * r * \b * \a

13. Describe comment statement. How many types of comment statement are used in C++?

12. Explain increment operator (++) and write the name of two ways of its usage.

Section "C"

14. Explain basic structure of C++?

2025

17. Define increment and decrement operators with examples.

15. Describe any four escape sequence character.

2023

SOME IMPORTANT QUESTIONS FROM NEW BOOK

1. Use \a and \r both escape sequences in a program.
2. How many types of comment statements are used in C++?
3. Write a program in C++ and use all arithmetic assignment operators.
4. What is basic difference between Assignment operator and Equal to operator.
5. What is the basic difference between \n and \t?

UNIT:4

CONTROL STRUCTURE

Section "B"

8. Why do we make block of statements using braces?

2025

9. What is the purpose of "default" statement in C++?

8. Define ITERATION/LOOP.

2024

12. Write down the purpose of any one from the following: (i) if (ii) goto (iii) cin	2023
3. Write down the purposes of any two statements: (i) if-else (ii) return (iii) exit () (iv) continue	2022
9. Explain the purpose of "default" in C++.	
11. Write the functions of "for loop".	

Section "C"

19. Write down the purpose and syntax of the following: (i) FOR (ii) WHILE (iii) DO-WHILE	2025
16. Write down any two purpose and syntax from the following loops: (i) for (ii) while (iii) do-while	2023

SOME IMPORTANT QUESTIONS FROM NEW BOOK

1. Can we use "while" loop in place of "for" loop, if yes then how?
2. What is the main difference between while and do while loops?
3. Which data type variables can be used in "switch" statement?
4. Write the purpose of following statements:
a. else if b. switch c. goto d. exit

UNIT:5

FUNCTIONS

Section "B"

4. Differentiate between function declaration and function definition.	2023
10. Why do we use header files?	

SOME IMPORTANT QUESTIONS FROM NEW BOOK

1. What is the purpose of keyword "void" in function?
2. Why we use header files?
3. Differentiate between passing argument and return the value from function.
4. What is difference between external variables and function local variables?
5. List the five standard built-In functions with examples.
6. Write down the advantages of User – define functions in C++.

UNIT:6

DIGITAL LOGIC AND DESIGN

Section "B"

3. Explain the purpose of Truth Table.	2023
8. Draw the Truth Table of $A.B.C = Y$	
4. Why do we use Boolean Algebra?	2022

Section "C"

15. Define types of Basic Logic Gate with its symbol and Truth Table.	2025
6. Define the following logic gates: (i) AND gate (ii) OR gate (iii) NOT gate	2024
19. Draw truth table of the following: (i) $Y = A \cdot B$ (ii) $Y = A \cdot B \cdot C$ (iii) $Y = \overline{AB}$	
17. Draw the logic circuit of the following Boolean expressions. (i) $z = \overline{(A + B)} + \overline{(A + B)}$ (ii) $z = \overline{(A \cdot B)} + \overline{(A + B)}$	2023

SOME IMPORTANT QUESTIONS FROM NEW BOOK

1. Explain all basic logic gates and their operations.
2. Differentiate between NAND and NOR gates.
3. Explain the function of Inverter.
4. Simplify the following Boolean expression. $Z = AB + A(B + C) + B(B + C)$

UNIT:7	INTRODUCTION TO SCRATCH
Section "B"	
12. What do you know about Script area in a Scratch Editor?	2025
13. What is the difference between using scratch online and offline	
11. Explain the Script and Sprite in Scratch.	2023

SOME IMPORTANT QUESTIONS FROM NEW BOOK

1. Explain the following: i. Script ii. Sprite iii. Backdrop
2. State the difference between repeat 10 and forever commands.
3. Write the use of the following codes: forever, wait, say, play sound, go to x, y.
5. What is the difference between using Scratch online and offline?

MISCELLANEOUS QUESTIONS

UNIT:	REMOVE THE ERROR
Section "B"	
9. Remove the error(s) from the following statements (any 3) (i) Cout >> "Pakistan" (ii) Age int = 55; (iii) if (a = b) (iv) float x = 13	2023

NOTE	Chapter	Years
Section "C"		
19. Write note on any two of the following: (i) int main () (iii) Preprocessor directive	3	2023
(ii) Pre-define functions	5	
(iv) Switch statement	4
