

CHEMISTRY XII

10 Year Questions Distribution

According to the Chapters.

This Distribution is carried out According to
NEW BOOK OF CHEMISTRY.

COMPILED BY M. Zubair Arif Yousufi

INORGANIC CHEMISTRY

QUESTIONS	YEARS
Chapter: 1	CHEMISTRY OF REPRESENTATIVE ELEMENTS
Section B	
2. i) Discuss the group trend of ionization energy and electronegativity in group IA, IIA and IIIA. iv) What is Bleaching Powder? Write its Preparation and properties. vi) Explain the auto-oxidizing and reducing properties of chlorine and give classification of Ligands. vii) —OR—What is diagonal relationship? Explain the diagonal relation between: *Li and Mg *Be and Al	2025
2. i) Describe group trend of atomic radius and electronegativity in S-block. v) What is diagonal relationship? Describe the diagonal relation between any two of the following: * Li & Mg * Be & Al * B & Si	2024
Section C	
3. a) Describe the manufacturing of H_2SO_4 by contact process. Show by equation that is an oxidizing agent and dehydrating agent. 3. a) —OR—Describe the manufacture of Caustic soda by	2025

Castner-kellner cell. What are the advantages and disadvantages of the process?	
3. a) Describe the industrial manufacturing of caustic soda by Castner – Kellner's process with labelled diagram. Write advantages and disadvantages of the process. 4. b) What is meant by Acid rain? Explain its causes and adverse effects on human life style. Also write equation for chemical reaction of Sulphuric acid with carbon and aluminum. 4. b) —(OR)— What is Bleaching powder? How it is prepared commercially explain with a diagram. Give its reaction with H_2O and HCl .	2024
4. b) How is caustic soda manufactured by Castner - Kellner process? What are the advantages and disadvantages of the process? Give their uses.	2023
3. a) Describe the industrial preparation of sulphuric acid by contact process.	2022
4. (a) Describe the manufacture of Caustic soda by Castner-Kellner process (Diagram is not needed)	2019
4. (a) Give the industrial preparation of Oil of vitriol by contact process with diagram.	2018
[OR 3. (a)] How is caustic soda manufactured by the electrolysis of brine using moving Mercury as Cathode, Draw also the diagram of this method.	2017
4. (b) Give the manufacture of Sulphuric acid by contact process.	2016

Chapter: 2

CHEMISTRY OF OUTER TRANSITION (d-block) ELEMENTS

Section B	
v) Explain any two of the following properties of 3d series of transition elements: * Colour of Complexes * Catalytic Activity * Binding Energy	2025
ii) What are outer transition elements? Describe any two of the following properties: * Variable Oxidation Conditions * Colour Formation * Magnetic Properties	2024
vii) Explain any two of the following properties of transition element:	2023

MODEL PAPERS XII (S) 232 **CHEMISTRY**

* Colour of complexes * Variable Oxidation State	* Ionization Potential	
2. (vii) Describe the refining of Copper by electrolysis of blister copper.		2019
2. (viii) Discuss any two of the following properties of Transition metals. *Magnetic properties *Formation of complexes		2018
2. (i) How is copper Matte obtained from its concentrated Sulphide Ore.		2017
2. (viii) With the help of Crystal field theory, explain the colour of Transition metal complex ions.		2016
2. (vii) How is Blister copper obtained from matte?		2015
I.U.P.A.C NAMING		
ii) Write the IUPAC name of the following: * $[Cr(en)_3](NO_3)_3$ * $[Zn(OH)_4]^{2-}$	* $[Pt(NH_3)_2Cl_2]^{2+}$ * $Na_3[Co(C_2O_4)_3]$	2025
iii) Write the IUPAC names of following: * $[Cu(en)_2]^{2+}$ * $[Ag(NH_3)_2]OH$	* $[Ni(SCN)_4]^{2-}$ * $K_3[Fe(CN)_6]$	2024
v) Write IUPAC names of the following complexes: * $[PtCl_2(NO_2)(NH_3)SO_4]$ * $NH_4[Cr(SCN)_4(NH_3)_2]$	* $[Co(H_2O)_6]Cl_3$ * $[Fe(CO)_3]$	2023
(v) Write IUPAC names of any four of the following complexes: * $[Pt(NH_3)_3(H_2O)]^{4+}$ * $[Co(en)_3](NO_3)_3$	* $K_3[FeF_6]$ * $[Ti(H_2O)_3]Cl_3$ * $[Ni(CN)_4]^{2-}$	2022
ii) Write the IUPAC names of any four of the following: * $K_3[Fe(C_2O_4)_3]$ * $[Cu(NH_3)_4]SO_4$ * $[Cr(H_2O)_6](NO_3)_3$	* $[Co(CN)_6]^{3-}$ * $[Ni(en)_2Cl_2]^{+2}$	2021
2. (vi) Write the I.U.P.A.C. names of the following complexes: * $[Co(en)_3](NO_3)_3$ * $[Cu(NH_3)_4]^{2+}$	* $[AuCl_4]^{-1}$ * $Na_3[Fe(CN)_5NO]$	2019
2. (vi) Write I.U.P.C. names of the following complexes: * $[Pt(NH_3)_2Cl_4]$ * $[Cu(CN)_4]^{2-}$	* $NH_4[Cr(SCN)_4(NH_3)_2]$ * $[Co(H_2N-CH_2-CH_2-NH_2)_3](NO_3)_3$	2018
2. (iii) Write the I.U.P.A.C. names of the following: * $[Pt(NH_3)_2Cl_2]$ * $[Fe(CO)_4]$	* $Na_3[AlF_6]$ * $[CoBr_2(en)_2]Br$	2017
2. (i) Write I.U.P.A.C. names of the following: * $[Co(NH_3)_5Cl]$ * $Na_3[Cu(OH)_2(NO_3)_2]$	* $[Cr(en)_3]Cl_3$ * $Na_3[Fe(CN)_5NO]$	2016

MODEL PAPERS XII (S) 233 **CHEMISTRY**

Section C	
4. a) Describe the various steps involve in the extraction of 99.99% pure copper from its chalcopyrite ore. Write the composition of duralumin and brass.	2025
4. a) Describe various steps involved as extraction of 99.99% pure copper from its ore. make diagram where needed.	2024
4. a) Describe the metallurgy of 99.99% copper from roasted pyrite ore.	2022
[OR 3. (b)] Describe the metallurgy of blister Copper from concentrated pyrite ore.	2018
3. (c) Describe any two of the following properties of 'd' block element: *Magnetic properties *Formation of Colour	2017
*Catalytic properties *Variable oxidation state	
3. (a) Describe the extraction of 99.99% Copper from roasted pyrite ore.	2016

**MISCELLANEOUS QUESTIONS
(INORGANIC CHEMISTRY)**

DEFINITIONS

Questions	CH	Year
vii) Define any four of the following: *Analgesic *Antibiotic *Anti-inflammatory Medicine. *Chiral Carbon	11 5	2025

SCIENTIFIC REASONS

REASONS	CH.	YEAR
2. i) (OR) Give any four scientific reasons of the following: * Alkaline earth metal possess smaller atomic radii and Alkali metal. * Acidity of hydrogen halides increases from HF to HI. * Ionization energy decreases from top to bottom in s-block elements. * Ligands are generally called Lewis-Bases. * Chromium exist in $4s^1, 3d^5$ configuration but not in	1 1 1 2 2	2025

MODEL PAPERS XII (S) 234 **كيمياء** **CHEMISTRY**

4s ² , 3d ⁴ .		
2. i) —(OR)—Describe reasons of the following: * HIF is weaker acid than HCl acid.	1	2024
* Alkali metals are good conductor of electricity.	1	
* Fluorine is the strongest oxidizing agent.	1	
* Transition elements have tendency to form alloys.	2	
(vii) Give any four scientific reasons of the following * Sulphuric acid has high boiling point	1	2022
* Alkali metals are powerful reducing agents.	1	
* Transition metals form non-stoichiometric compounds.	2	
2. (iv) Give scientific reasons for any Four of the following: * Alkali metals form cations easily.	1	2019
* Transition metals form non-stoichiometric compounds.	2	
2. (ii) Give scientific reasons for the following: * Alkaline earth metals are harder than Alkali metals.	1	2017
2. (iii) Give scientific reasons for the following: Alkali and alkaline earth metals form only +1 and +2 ions respectively	1	2016
2. (ii) Give scientific reasons for the following: * Alkali metals are powerful reducing agents. * SO ₂ is dissolved in H ₂ SO ₄ but not in water.	2	2015
* Transition elements show variable oxidation states	2	

NOTE

QUESTIONS	CH.	YEAR
4. (c) Write notes on any two of the following: * Bleaching Powder	1	2019

PREPARATION/REACTION

QUESTIONS	YEARS
xiii) Write the chemical equation of any four of the following: * Reaction of Ethyne with HBr. * Reaction of ethanol with acidified K ₂ Cr ₂ O ₇ . * Reaction of Grignard reagent with CO ₂ * Reaction of ethandiol with HIO ₄ . * Reaction of ethanal with alcohol.	2025

MODEL PAPERS XII (S) 235 **كيمياء** **CHEMISTRY**

Section C	
3. b) Write any Eight chemical equation for the following: * A mixture of nitrogen and silicon is heated under elevated temperature. * Phosphorous is put into water. * Chlorine gas is passed through hot solution of Caustic soda. * Reaction between KMnO ₄ and FeSO ₄ (write ionic equation). * Reaction of Mn with air. * Reaction of copper with concentrated HNO ₃ * Reaction of Aluminum with caustic soda. * Reaction of Rubidium with air. * Reaction of Fluorine with oxygen. * Reaction of chromium with water.	2025
3. b) Write a balance chemical equation for the following reactions: * Nitrogen reacts with oxygen in the presence of a catalyst. * Bleaching powder reaction with HCl. * Reaction of potassium with ethyl alcohol. * A piece of copper is dipped in concentrated sulphuric acid. * Phosphorus is put into water. * Chromium reaction with steam. * Reaction of Mn with air. * Ferric chloride reaction with NaOH.	2024

ORGANIC CHEMISTRY

Chapter: 3	ORGANIC COMPOUNDS
Section B	
viii) Define any four of the following: * Catenation * Bucky Ball * Functional Group * Isomerism * Reforming of Petroleum	2025
viii) —OR—Describe homologous series of organic compound and write three properties of homologous series.	2024
xii) Define homologous series and write its three general properties.	2024
Section C	
5. (b) Define Polymerization. How many types of Polymerizations are there?	2015

Chapter: 4	NOMENCLATURE OF ORGANIC COMPOUNDS	
Section B		
ix) Write any four IUPAC name of the following:		2025
$\bullet \text{CH}_3(\text{CH}_2)_5\text{COO C(CH}_3)_3$ $\bullet (\text{CH}_2)_5(\text{COOH})_2$		
		
$\bullet \text{CH}_3 - \text{CH}_2 - \text{OC(CH}_3)_2\text{C}_2\text{H}_5$ $\text{CH}_3 - \text{CH}_2 - \text{C}(\text{O}) - \text{CH}_2 - \text{COOH}$		
ix) Write the IUPAC name of the following:		2024
$\bullet \text{CH}_3 - \text{CH}_2 - \text{CH}(\text{OH}) - \text{CH}_2 - \text{COOH}$ $\bullet \text{C}_2\text{H}_5 - \text{CH}_2 - \text{C}(\text{O}) - \text{OCH(CH}_3)_2$ $\bullet \text{C}_2\text{H}_5 - \text{O} - \text{CH}_2 - \text{C(CH}_3)_3$ $\bullet \text{CH}_2 = \text{CH} - \text{C} \equiv \text{C} - \text{CH} = \text{CH}_2$		
xiii) Write IUPAC names of any four of the following organic compounds:		2023
$\bullet \text{CH}_3\text{O} - \text{CH}_2 - \text{CH}(\text{CH}_3) - \text{CH}_3$ $\bullet \text{CH}_3 - \text{CH}(\text{OCH}_3) - (\text{CH}_2)_3 - \text{COOH}$ $\bullet (\text{CH}_3)_2\text{CH} - \text{C}(\text{O}) - \text{C}(\text{CH}_3)_3$	$\bullet \text{CH}_2 = \text{CH} - \text{C} \equiv \text{C} - \text{CH} = \text{CH}_2$ $\bullet \text{C}_6\text{H}_5\text{COO.C(CH}_3)_3$	
(xii) Write IUPAC names any four of the following:		2022
$\bullet (\text{CH}_3)_2\text{C} = \text{CH} - \text{CH}_2 - \text{CH}(\text{CH}_3)\text{Cl}$ $\bullet \text{CH}_3 - \text{CH}(\text{OH}) - \text{CH}_2 - \text{COOH}$		
$\bullet \text{CH}_2 - \text{C}(\text{O}) - (\text{CH}_2)_4 - \text{CHO}$		

x) Write I.U.P.A.C. names any four of the following:		2021
$\bullet (\text{CH}_3)_2 - \text{CH} - (\text{CH}_2)_2 - \text{CH}(\text{CH}_3)_2$ $\bullet \text{CH}_3 - (\text{CHOH})_2 - \text{CH}_2\text{OH}$ $\bullet \text{CH}_2 = \text{CHCHClCH}_2\text{C} \equiv \text{CH}$ $\bullet \text{CH}_2 = \text{CH} - \text{CH}_2\text{CHO}$ $\bullet \text{CH}_3 - \text{CH}_2\text{COCH}(\text{CH}_3)_2$		
2. (xiv) Write I.U.P.A.C. names for any Four for the following:		2019
$\bullet \text{CH}_3 - \text{CH}(\text{OH}) - \text{CH} = \text{CH}_2$ $\bullet \text{CH}_3 - \text{CH}_2 - \text{CH}(\text{OH}) - \text{CH}_2 - \text{COOH}$ $\bullet \text{CH}_3 - \text{CH}_2 - \text{C}(\text{O}) - \text{CH} - \text{CH}_2 - \text{COOH}$ $\bullet \text{C}_2\text{H}_5 - \text{O} - \text{CH}_2 - \text{C(CH}_3)_3$		
2. (xiv) Write I.U.P.A.C. names for any four for the following:		2018
(i) $\text{CH}_2 = \text{CH} - \text{C} \equiv \text{C} - \text{CH} = \text{CH}_2$ (ii) $\text{CH}_2 - (\text{CH}_2)_3 - \text{COOC(CH}_3)_3$ (iii) $\text{COH} - (\text{CH}_2)_3 - \text{CH} - \text{CH}_3$ (iv) $\text{CH}_3 - \text{CH}(\text{CH}_3) - \text{CH}_2 - \text{COOH}$ (v) $\text{CH}_3 - \text{CO} - \text{CCl}_3$		
2. (xii) Write I.U.P.A.C. Name of the following		2017
$\bullet \text{CH}_2 = \text{CH} - \text{CH}_2 - \text{COOH}$ $\bullet \text{C}_2\text{H}_5 - (\text{CH}_2)_3 - \text{COCH(CH}_3)_2$ $\bullet \text{CH}_3 - \text{C(CH}_3)_2 - \text{COCH(CH}_3)_2$ $\bullet \text{CH}_3 - \text{CH}_2 - \text{OC(CH}_3)_2\text{C}_2\text{H}_5$		
Section C		
6. (c) Write the I.U.P.A.C. names of the following:		2016
(i) $(\text{C}_6\text{H}_5)_2\text{CBr}$ (ii) $\text{C}_6\text{H}_5\text{OCH(CH}_3)_2$ (iii) $\text{H}_2\text{C} = \text{CH} - \text{CH}(\text{Cl}) - \text{CH}_2 - \text{CH}(\text{CH}_3) - \text{C} \equiv \text{CH}$ (iv) $(\text{CH}_3)_2\text{CH} - \text{C}(\text{O}) - \text{C(CH}_3)_3$ (v) $\text{CH}_3 - \text{C}(\text{O}) - \text{CH}_2 - \text{COOH}$		

MODEL PAPERS XII (S) 238

2015

6. (c) Write I.U.P.A.C. names of the following

(i) $(CH_3)_3C-CH_2-CO-CH(CH_3)_2$

(ii) $CH_3-CH_2-\overset{\overset{O}{\parallel}}{C}-CH_2-COOH$

(iii) $CH_3-CH_2-CH_2-CH_2-CH_2-CH(CH_3)_2$

(iv) $CH_3-CH=CH-CH_2-CH_2$

$OC_2H_5 \quad OC_6H_5$

(v) $CH_3-CH=C=CH-CH_2$

Chapter: 5 **INTRODUCTION TO
HYDROCARBONS**

Section B

x) Draw and explain orbital structure of Ethyne and write two methods of its preparation. xi) Write equation and mechanism of sulphonation and nitration of benzene. xii) What is Free Radical? Explain the reaction mechanism of chlorination of methane in the presence of sunlight.	2025
viii) Draw the structure of Ethane. By a chemical test distinguish between ethane and ethyne. xi) Write the chemical equations for the following: * Friedal Craft Alkylation. * Friedal Craft Acylation	2024
ix) Draw and explain orbital structure of ethane and write two methods of its preparation. xii) Define electrophile. Give stepwise reaction mechanism of following reactions of benzene * Chlorination * Acylation	2023
(ix) The structures of organic molecule (A and B) are shown below: $\begin{array}{c} \text{H} - \text{C} = \text{C} - \text{H} \\ \quad \\ \text{H} \quad \text{H} \end{array}$ A $\text{H} - \text{C} \equiv \text{C} - \text{H}$ B * Draw the hybrid orbital structure of 'B' with number of Sigma and Pi bonds * Give equation for preparation of A by the dehydration of ethanol. (x) What are Electrophiles? Give the reaction mechanism of	2022

CHEMISTRY	
Friedel-Craft alkylation and sulphonation Benzene.	
ix) The structure of two significance organic molecules A and B are shown below:	2021
$ \begin{array}{ccccccc} & H & & H & & H & & H \\ & & & & & & & \\ H & - C & - & C & - H & & C & - C \\ & & & & & & & \\ & H & & H & & H & & H \end{array} $	
* Draw the hybrid orbital structure of 'B'	
* Give simple chemical test between A and B	
2. (xi) Define Free radical.	2019
2. (xii) Draw the orbital structure of Ethylene.	
2. (xiii) Why does Benzene give electrophilic substitution reaction? Give stepwise mechanism of nitration and chlorination in Benzene.	
2. (iv) Define Isomerism. Give its types with examples.	2018
2. (xi) Draw and explain the orbital structure of Acetylene. Give two methods of its preparation.	
2. (xii) Give mechanism of these electrophilic substitution reaction of Benzene.	
*Friedel-Craft acylation	*Sulphonation
2. (x) The structure of two organic compounds 'A' and 'B' are shown below:	2017
$ \begin{array}{cc} \begin{array}{c} H & H \\ & \diagdown \quad \diagup \\ & C = C \\ & \diagup \quad \diagdown \\ H & H \end{array} & \begin{array}{c} H & H \\ & \diagdown \quad \diagup \\ & C - C \\ & \diagup \quad \diagdown \\ H & H \end{array} \\ (A) & (B) \end{array} $	
* Draw the hybrid orbital structure of 'A' showing bonds.	
2. (xv) Write equations and give the mechanism of Alkylation and Acylation in benzene.	
2. (x) Draw and explain the orbital structure of Acetylene.	2016
2. (x) Draw and explain the orbital structure of Ethene.	2015
2. (xi) Write the Nitration reaction in Benzene along with its mechanism.	
Section C	
6. a) Explain molecular orbital treatment of benzene and give the preparation of TNT, m-nitrotoluene and cyclohexane.	2025
6. a) ---(OR)--- What is meant by orientation in Benzene? What are ortho, para and meta director group? Give example for each. Give the equation for the preparation of m-nitrotoluene from benzene.	2024
6. b) Explain the molecular orbital treatment of benzene and	2023

MODEL PAPERS XII (S) 240

CHEMISTRY

how benzene is prepared from aliphatic and aromatic hydrocarbon and give two equations of each.	2022
6. a) What is Orientation in Benzene? Explain orientation in monosubstituted Benzene. Give the names of ortho-para and meta directing groups.	
6. a) (OR) Write the two possible explanations for benzene behaves as saturated and unsaturated compounds? Describe Kekule structure.	
5. Explain the molecular orbital treatment of benzene.	2021
5. (a) Explain Molecular Orbital treatment of Benzene.	2019
5. (a) What is orientation in Benzene? Explain orientation in mono-substituted Benzene. Give the names of ortho-para and meta directing group	2018
[OR 5. (a)] Give Kekule's structure of Benzene.	
5. (a) Explain the structure of Benzene by molecular orbital treatment and discuss the stability of Benzene molecule.	2017
5. (c) Describe Kekule structure of Benzene.	2016
5. (a) Explain the molecular orbital treatment of Benzene. Also draw the resonance structures of Benzene.	2015

Chapter: 6	ALKYL HALIDES & AMINES
Section B	
x) —OR—What are amines? Give three methods of preparation of amines.	2025
x) What are organometallic compounds? Write the equation of methyl magnesium iodide with the following: * H ₂ O * CO ₂ * CH ₃ NH ₂	2024
xiv) What is Nucleophilic substitution reaction? Write the mechanism SN ¹ reaction of (CH ₃) ₃ CCl with NaOH.	
(xiii) What are Organometallic compounds? Give the chemical equation for the preparation of 1 st , 2 nd , 3 rd alcohol from CH ₃ MgI.	2022
2. (xv) What is Organometallic compound? How is it prepared? Starting CH ₃ MgI prepare the following: * Ethane * Ethanoic Acid * Ter-Butyl alcohol	2019
2. (xiii) What is Grignard Reagent? Give in reactions with the following * CH ₃ - NH ₂ * HCHO * CO ₂ * CH ₃ - CO - CH ₃	2018
2. (xvi) Why do 1° Alkyl halides give SN ² mechanism while 3°	2016

MODEL PAPERS XII (S) 241

CHEMISTRY

Alkyl halides give SN ¹ mechanism?	
2. (xiii) What are Organometallic compounds? Prepare the following from any one organometallic compound. * Ethane * Ethyl Alcohol * Vinegar	2015
Section C	
5 a) What is meant by nucleophile? Give mechanism of the following reactions: * SN ¹ reaction between 3° alkyl halide and NaCN. * SN ² reaction between 1° alkyl halide and NaOH. Write three methods for the preparation of Alcohol.	2025
6. a) —OR—What are organometallic compounds? How is Grignard reagent prepared? Write the reactions of CH ₃ MgI with water, alcohol, ester and amines.	
5. a) What are elimination reactions? Explain E ¹ & E ² mechanism with suitable examples.	2024
5. (a) Explain the mechanism in detail of SN ¹ and SN ² reaction and how the following is obtained from Grignard reagent. * n-butane * 2-methyl-2-propanol * Ethanoic acid	2023
5. a) What is β - elimination reaction? Explain the mechanism of E ₁ and E ₂ reactions.	2022
5. (OR)—Explain SN ¹ and SN ² reaction mechanism with example.	2021
6. (a) What are Nucleophilic substitution reaction? Explain the reaction mechanism of SN ² and SN ¹ with example	2019
5. (c) What is β-Elimination reaction? Write the mechanism of E ₁ and E ₂ reactions.	2018
6. (a) What are nucleophilic substituting g reaction. Outline the stepwise reaction mechanism for the following (i) SN ² reaction between Bromo methane and NaOH (ii) SN ¹ reaction between 2-chloro-2-methyl propane and NaCN.	2017
6. (a) What is Elimination reaction? Explain the mechanism of E ₁ and E ₂ reactions.	2016
6. (a) What is Nucleophile? Explain the reaction mechanism of SN ₁ and SN ₂ reactions with example.	2015

Chapter: 7	ALCOHOLS, PHENOLS AND ETHERS
Chapter: 8	CARBONYL COMPOUNDS I:

MODEL PAPERS XII (S) 242 **CHEMISTRY**

ALDEHYDES AND KETONES

Chapter: 9	CARBONYL COMPOUNDS I: ALDEHYDES AND KETONES
------------	--

Chapter: 10 **BIOCHEMISTRY**

Section B

xiv) Classify various proteins on the basis of functions and write its importance.	2025
xiv) —OR— Explain the role of glucose, sucrose and lactose in health and disease.	

Section C

6. a) What are carbohydrates? Classify on the bases of structure and give their biological significance.	2024
[OR 6. (a)] What are carbohydrates? How are they classified and discuss the biological importance of carbohydrates.	2018

Chapter: 11 **INDUSTRIAL CHEMISTRY**

Section B

vi) What are synthetic polymers? Explain PVC OR Nylon.	2024
--	------

Section C

4. b) Write notes on any three of the following *PVC *Nylon *Fertilizer *Detergent	2025
---	------

Chapter: 12 **ENVIRONMENTAL
CHEMISTRY**

Section B

iii) Explain any two of the following: *Catalytic Converter *CFC *Industrial Smog	2025
--	------

iv) How is ozone layer formed? What are the causes of its depletion?	2024
--	------

Section C

4. b) What is meant by Acid rain? Explain its causes and adverse effects on human life style. Also write equation for chemical	2024
--	------

MODEL PAPERS XII (S) 243 **CHEMISTRY**

reaction of Sulphuric acid with carbon and aluminium.

Chapter: 13 **ENVIRONMENTAL
CHEMISTRY**

Section B

vii) What is spectrometry? Describe one use of each of the following: * IR * UV * Mass Spectroscopy	2024
--	------

MISCELLANEOUS QUESTIONS

(ORGANIC CHEMISTRY)

DEFINITIONS

Questions	CH	Year
viii) Define the following: * Homologous Series * Catenation	3	2023
(viii) Define the following: * Functional group	3	2022
* Isomerism	5	
vii) Define the following: * Polymerization * Homologous series	3	2021
* Catenation	3	
2. (ix) Define the following: * Homologous Series	3	2019
2. (x) Define the following: * Polymerization * Catenation	3	2018
2. (ix) Define the following: * Functional group * Catenation	3	2017
2. (ix) Define the following terms: * Isomerism	5	2016
2. (ix) Define the following with examples: * Catenation * Functional group	3	2015
