

COMPUTER XI

10 Year Questions Distribution

According to the Chapters.

COMPILED BY Badar Sami

QUESTIONS	YEARS
Chapter 1: BASIC CONCEPTS OF INFORMATION TECHNOLOGY	
Section B	
iii) What do you mean by primary and secondary storage? iv) Define the role of application software in computer field. v) Define the concept of binary digits (bit, bytes and Nibble) in computing. vi) What is the difference between compiler and interpreter? vii) What are main difference between Impact and Non-Impact Printer? ix) Define any three input and output devices. xii) Define different types of ROM. xiv) Draw block diagram of a computer system. xi) What is the main purpose of ALU? xv) Define advancement in computer generation and highlight the key features of fourth generation.	2025
ii) Differentiate Primary Memory and Secondary Memory. iii) What is Cache? Mention its types. iv) What is Language Translator? Define Interpreter. xi) What is a Port? Enlist its types. xii) Enlist five functions of an Operating System.	2024
2. i) What is data communication? Name its components ii) Write any three differences between Impact Printer and Non-Impact Printer. vi) Why ROM is called non-volatile memory? vii) What is the function of a Compiler and an interpreter?	2023
2. (i) What is an Interpreter? How does it differ from a compiler? (iii) What is the difference between Hardcopy and Softcopy? (iv) Why ROM is called non-volatile memory?	2022

(vii) Define the main components of CPU. (xi) Draw a label diagram of a digital computer.																	
2. (i) Differentiate between Compiler and Interpreter 2. (iii) Define non-volatile memory. Name any three. 2. (v) Define the function of Control unit in CPU 2. (vi) Why Operating System is the most important software in a computer system. 2. (viii) How cache memory is different from RAM. 2. (x) Draw a Block diagram of Computer System.	2021																
(iii) Which mode of Data transmission is suitable for communication from a computer to a printer? (vi) Differentiate between Volatile memory & Non-Volatile memory. (vii) Define Impact Printer and Non-Impact Printer. (ix) Draw the block diagram of a Digital Computer. (xii) Why is an Operating System necessary for a computer?	2019																
(iii) Define control unit of CPU (iv) What are the peripheral devices? Name any three (viii) Define Memory word. (xvii) Why is ROM called non-volatile memory? (xviii) Write input or output device in the given column <table border="1" data-bbox="411 1144 1201 1518"> <thead> <tr> <th>Hardware</th><th>Input/Output</th></tr> </thead> <tbody> <tr><td>Hardware</td><td></td></tr> <tr><td>Monitor</td><td></td></tr> <tr><td>Keyboard</td><td></td></tr> <tr><td>Plotter</td><td></td></tr> <tr><td>OMR</td><td></td></tr> <tr><td>Touch Pad</td><td></td></tr> <tr><td>Drum Printer</td><td></td></tr> </tbody> </table>	Hardware	Input/Output	Hardware		Monitor		Keyboard		Plotter		OMR		Touch Pad		Drum Printer		2018
Hardware	Input/Output																
Hardware																	
Monitor																	
Keyboard																	
Plotter																	
OMR																	
Touch Pad																	
Drum Printer																	
(ii) Enlist any six features of an Operating System. (iii) What will happen, if RAM is not available in a Computer System? (v) What is Application Software? Name at least five application Software. (vii) Why is cache memory used in Computer System? (viii) What is port? Enlist its types. (xii) Define bit, Byte and word. (xviii) Write the input device or output device in the given column. <table border="1" data-bbox="483 1966 1134 2112"> <thead> <tr> <th>Hardware</th><th>Input / Output</th></tr> </thead> <tbody> <tr><td>Joystick</td><td></td></tr> <tr><td>Scanner</td><td></td></tr> </tbody> </table>	Hardware	Input / Output	Joystick		Scanner		2017										
Hardware	Input / Output																
Joystick																	
Scanner																	

Mouse		
Touch Screen		
LED		
Inkjet Printer		
(xi) How is secondary storage different from primary storage?		
(xiii) Why is ROM called non-volatile memory?		
2. (i) Define the following terms related to screen display: CRT, Pixel, Resolution. (ii) List the virus functions normally performed by the Operating system. (vii) Define ROM and its types. (ix) Define the main components of CPU		2016
(vi) Define the following: *Bus *Cache Memory *Bar Code Reader (vii) Differentiate between Volatile Memory and Non-volatile Memory. (ix) What is Operating System? Why is it necessary for computer system?		2015
Section C		
3. What is a Monitor? Explain CRT and Flat Panel Monitors with their types. 4. Explain different types of Printers. 6. What are Scanning Devices? Explain their different types.		2024
3. What is System Software? Explain operating system with its function.		2023
3. What is an Operating System? Explain the functions performed by an operating system.		2022
4. What is printer? Discuss different types of Impact printers.		2021
5. (b) Explain the important features of an Operating System. 5. (c) What is meant by Primary and Secondary Storages? Define any three types of secondary storage.		2019
3. (a) What are Scanning input devices? Explain any two scanning device. 4. (a) What are the different types of Non-Impact Printers? 4. (c) Define System Software and explain its three categories. 5. (c) What is Language translator? Define its different types.		2018
3. (a) Explain different types of Impact printers. 3. (b) What is System Software? Discuss its types. 5. (c) Discuss the characteristics of Computer.		2017
3. (b) What is System Software? Define its different types. 4. (a) What is Secondary memory? Define its types.		2016

4. (b) Define different types of Scanning devices.	
5.(a) Explain the different types of Impact Printers.	2015

Chapter 2: INFORMATION NETWORKS

Section B

2. i) What are the main devices of IoT? viii) What is Metropolitan Area Network?	2025
v) Why star topology is the most reliable?	2024
v) Which technical issue is common in Ring and Bus Topology? ix) What is the main difference between Router and Gateway?	2023
(v) Write any four abuses of Internet. (x) How computers can be useful in medical science? (xv) Define Star topology, and give its advantages.	2022
(ii) Define any two of the following: * Bridge *Router *Gateway (v) Define Ring topology and give its advantages. (x) How is Internet useful in the field of education? (xiii) What are the components of LAN?	2019
(i) Write any three abuses of internet. (vi) Give three main objectives of LAN. (xi) How is computer beneficial in Banks? (xvi) What are the elements of Data communication?	2018
(xiv) What is network topology? Name any three. (xvii) List the benefits of LAN.	2017
(iii) Define Ring topology and give its advantages and disadvantages. (v) State the uses and abuses of internet. (vi) What are the benefits of developing a Computer network?	2016
(iii) What are the functions of Router and Gateway in Data Communication? (iv) What is Internet? Define its components.	2015

Section C

3. Define Computer Network. Describe LAN and WAN with the diagram.	2025
4. Define data communication Also describe its main components.	
5. Describe different modes of data communication with examples.	
4. What is Computer Network? Explain different types of network topologies.	2023
3. Explain Basic logic gates with diagrams.	2021

6. What is Topology? Discuss its types.	
3. (c) Define Data communication modes with diagram.	2018
5. (b) Explain LAN topologies with diagram	
3.(a) Explain any four LAN Topologies.	2015

Chapter 3: DATA COMMUNICATIONS

Section B

ii) Differentiate between Synchronous and Asynchronous.	2025
vi) Define the following: * Simplex Mode * Half-Duplex Mode * Full-Duplex Mode	2024
vii) What is Synchronous Transmission?	
viii) Draw a labelled diagram of OSI reference model.	
iv) What is meant by Modulation and De-modulation?	2023
viii) What do you mean by Broadcasting?	
x) Name any two simplex devices used in communication system.	
xiii) Name the fastest communication media.	
xiv) Define Protocol. Name any three protocols.	
(viii) Draw OSI model.	2022
(ix) Differentiate between asynchronous transmission and synchronous transmission.	
2. (ix) Write the purpose of MODE M	2021
2. (i) Define Protocol and name any three.	2019
(viii) Define Analog Single and Digital Signal.	
(xiv) What are the basic hardware needed for Internet?	
(xv) Name any two Full-duplex devices.	
(xvii) Draw the layer cake of OSI model.	
(x) Why is Modem called Moderator and Demodulator	2018
(iv) What is Protocol? Enlist four different protocols.	2017
(x) Draw labeled diagram of OSI model.	
(xv) Which layer of OSI model is responsible for routing information between computers?	
(xvi) Define the term Bandwidth.	
2. (i) What is the function of Modem? Define different types of Modem.	2015
(viii) Define Simplex, half-duplex and full-duplex moods of Data Communication.	
Section C	
5. Explain OSI model with layered diagram.	2023

7. What is Communication Media? Discuss its different types.	
4. Explain different types of communication media /channel used in data communication.	2022
5. (a) Define Synchronous & Asynchronous transmissions with diagrams.	2019
4. (b) Explain the OSI model with diagram.	2018
5. (a) Describe the various types of communication media used for data communication.	
4. (a) Discuss the modes of transmission with examples.	2017
4. (b) Differentiate between Asynchronous and Synchronous transmission methods.	
3.(a) Describe the OSI model with diagram.	2016
5. (b) Define Microwave system. How can it be useful in communication system?	
3. (b)What do you mean by Protocol? Define any two types of Protocol.	2015
4. (b)Explain Synchronous Transmission and Asynchronous Transmission.	
5. (b) Explain the advantages and disadvantages of Fiber Optic Cable.	
Chapter 4: APPLICATIONS AND USED OF COMPUTERS	
Section B	
Chapter 5: COMPUTER ARCHITECTURE	
Section B	
x) Draw any one diagram of the following equation using logical gates: $(A.B) + (A.B) = C$ $X + (Y.Z) = W$	2025
2. i) Draw a labelled diagram of Data Processing Cycle.	2024
x) Define the term 'BUS' with two examples.	
xiii) Define PUSH and POP in STACK.	
ix) What is ASCII coding scheme?	
xi) Why Address Bus is called unidirectional?	2023
xii) Draw the block diagram of Fetch Cycle.	
(ii) What is Data Processing Cycle? Write its steps with the help of diagram.	2022
(xii) Define the instruction cycle with labeled diagram.	
2. (ii) Define any two laws of Boolean Algebra	2021

(xi) Why is an Address Bus called unidirectional?	2019
(vii) Why is the data-bus called bi-directional bus?	2018
(ix) Define Fetch cycle.	
(i) What is Data Processing Cycle? Write its steps with the help of a diagram.	2017
Section C	
7. What is Boolean Algebra? Also write its rules and construct a truth table for two inputs to perform AND & OR logical operations.	2025
6. What is CPU Register? Explain its different types.	2023
5. What is a Register? Explain the functions of various types of registers.	2022
3. (c) Define the term Bus. Describe the functions of any two Buses.	2019
4. (b) What is Stack? Explain its operations with examples.	
3. (b) What is a computer register? Define its four types.	2018
3. (c) Discuss the major components of Computer System.	2017
4. (c) Describe instruction Fetch cycle.	
5. (a) What is the use of Buses in computer system? Discuss the functions of any two buses.	
4. (a) What are Registers? Write the function of any three Registers.	2015
Chapter 6: SECURITY, COPYRIGHT AND THE LAW	
Section B	
iii) What is a Computer Virus? How can we protect our computer from virus?	2023
xv) What is Copyright Law?	
(vi) State Copyright Law. Give its advantages.	2022
(xiv) Define the Computer Virus. Name any two viruses.	
2. (vii) Why do we need to keep antivirus updated?	2021
(xvi) What is Computer crime?	2019
(v) List the three benefits of copyright.	2018
(xii) How is virus transferred from one Computer to another?	
(vi) What measures can be taken to save computer system from virus attacks?	2017
(ii) What is computer Virus? Define different types of Virus.	2015
Section C	

5. What is Software Privacy? How can we protect our Software?	2024
7. Define Computer Virus. Explain its types.	
5. What is Computer Virus? Explain its different types.	2021
3. (b) What is a Computer Virus? What preventive measures can be taken to protect our computer from its attacks?	2019
4. (a) State Copyright law. Give its advantages.	
4. (c) What is software piracy? Explain	2018
5. (b) What is computer crime? How is the computer being used as tool of crime?	2017
5.(a) Define Antivirus and its different types.	2016
Chapter 7: OPERATING SYSTEM (WINDOWS)	
6. What is the purpose of an Operating System in a computer? Describe its features.	2025
(xiii) What is the difference between command line interface and GUI.	2018
Chapter 8 & 9: WORD PROCESSING & SPREADSHEET	
Section B	
Chapter 10: INTERNET BROWSING AND USING E-MAIL	
Section B	
xiv) What is an Email? Write three advantages of Email.	2024
(ii) What is a search Engine? Name any three search engines.	2018
(xv) What is website address? Name any two websites.	
(iv) Define search Engine.	2016
Section C	
3. (a) What is Internet Browser? Describe its various types.	2019

MISCELLANEOUS QUESTIONS

Match the terms of column A with those of column B		
xiii) Convert any three of the following number system.		2025
* $(0111)_2 \dots (?)_{10}$	* $(243)_8 \dots (?)_{10}$	
* $(188)_{10} \dots (?)_2$	* $(659)_{10} \dots (?)_8$	
* $(ABC)_{16} \dots (?)_{10}$	* $(785)_{10} \dots (?)_{16}$	

(xviii) Match the terms of column A with those of column B		2019
Column "A"	Column "B"	
Keyboard	Operating System	
Non-Volatile	Firmware	
Byte	LAN	
DOS	ROM	
BIOS	8 bits	
Local Area Network	Input device	

FULL FORMS

xy) Write the full form of any six of the following abbreviations:

Write Full forms of the following: OR		
ABBREVIATION	FULL FORM	YEAR
* LED	Light-Emitting Diode	2024
* LCD	liquid-crystal display	
* MBR	Master Boot Record	
* IR	Instruction register	
* BIOS	Basic Input Output	
* ALU	Arithmetic and logic operations	
* CPU	Central Processing Unit	
* TCP	Transmission Control Protocol	
* IP	Internet Protocols	2022
* MBR	Master Boot Record	
* ISO	Open System Interconnection	
* HTTP	Hypertext Transfer Protocol	
* LED	Light-Emitting Diode	
* OMR	Optical Mark Recognition	2021
* DIMM	Dual In-Line Memory Module	
* CRT	Cathode Ray Tube	
* BIOS	Basic Input Output	
* PROM	Programmable Read-Only Memory	2019
* HTTP	Hypertext Transfer Protocol	
* URL	Universal Resource Locator	
* SIMM	Simple Inline Memory Module	2018
HTML	Hyper Text Markup Language	
LED	Light-Emitting Diode
